

FSLI receives acceptance into Microsoft's ISV Partner Program

Annapolis, MD (October 28, 2004) – Foundation Software Laboratories Inc. (fslipartner.com), a leader in Financial Management Software for the Legal and Professional Services industries, announced today that the company has completed the requirements for acceptance in Microsoft's ISV program and has attained status as a Certified Partner with Microsoft.

"FSLI has invested heavily in Microsoft technologies from a development perspective. Our entire suite of applications is written in Microsoft's Visual Studio C++ development environment and the application is highly tuned to run on Microsoft's SQL Server platform. FSLI has invested significant resources in developing Microsoft.NET applications to compliment our current product suite. Given our commitment to the Microsoft platform and the pervasiveness of Microsoft throughout the legal community, it made sense for FSLI and Microsoft to formalize our relationship. We now enjoy extensive development, support and marketing assistance from our newest partner."

-Carl Mack, President and CEO, FSLI.

Under this new agreement, FSLI's is licensed to sell key Microsoft components such as Microsoft SQL server in conjunction with the PD Partner application suite at significantly reduced costs. End users can benefit both financially and technically from a system that exploits the value built into SQL Server.

The certification process requires the application be tested and certified by Microsoft personnel and that Microsoft verify through references that the product has been successfully implemented in multiple client environments. Both requirements were completed in October of this year.

About Foundation Software Laboratories. Inc.

FSLI is a developer and marketer of innovative financial and business intelligence application software for medium-to-large size law firms. Since 1981, FSLI has been helping law firms reduce costs and increase profitability by improving the efficiency of their account practices.
