

## FSLI to release Version 10.2 of PD Partner on December 4<sup>th</sup>, 2004

**Annapolis, MD (November 23rd, 2004)** – Foundation Software Laboratories Inc. (fsl.net), a leader in Financial Management Software for the Legal and Professional Services industries, announced today that Version 10.2 of its PD Partner Solution is ready for commercial release and will be available for download on December 4<sup>th</sup> 2004. Version 10.2 provides FSLI customers with numerous enhancements and new programs designed to streamline the process of law firm billing and accounting.

PD Partner release 10.2 provides over 20 new management reports, over 25 customer requested enhancements and several new features including:

**Auto-post:** Law firms will be able to select whether the system operates as a fully real-time system, a traditional session-based system or as a customized combination. Each firm will be able to specify which types of financial transactions automatically post to the GL.

“We have found that our customers have varying requirements when it comes to the posting of financial transactions. Some firm’s want the process to be completely automatic; others prefer the control of a secondary process. Still others prefer a mix of the two environments. Version 10.2 offers the customer options on how interaction will occur between the sub-ledgers and general ledger. Now the system works the way the firm does rather than the other way around”.

Thompson Ellis – Product Development Manager

**Global Search and Replace:** Name and address changes are a part of doing business. As clients relocate, change personnel or attorneys retire or resign, it becomes necessary to make global changes to the time &\* billing system. This new module provides the ability to make sweeping changes in the database as important file related variables change. As with all PD Partner programs, audit trail is complete and automatic.

“FSLI continues to honor its commitment to its customers by once again providing a quarterly release with substantial enhancements to the system. This on going development process ensures FSLI customers continue to benefit from their relationship with FSLI.”

Denise Wikman – VP Sales & Marketing
